

PVD Coatings Technician

Surface Solutions, a small company that applies state-of-the-art PVD hard coatings to industrial tools and wear parts, is looking for a *PVD coatings technician*. If you are a conscientious person with good mechanical aptitude and would like an interesting job, we would like to talk to you.

As a *PVD coatings technician*, your duties would include:

- Learning how to clean tools.
- Handling and fixturing tools for the coating process.
- Operating and maintaining the vacuum coating systems.
- Evaluating cleaning and coating results and inspecting tools.
- Polishing precision tools.
- Learning the PVD coating business inside and out.

Our PVD coatings are used throughout industry (metal cutting, punching, stamping, forming, injection molding, surgical instruments, medical components etc.) to extend tool life, reduce manufacturing costs and improve profitability. Your job with Surface Solutions will offer exposure to a wide variety of manufacturing companies and processes.

We realize that most schools don't teach what we do. Therefore, all we ask in a candidate is a good attitude, some mechanical ability, and a willingness to learn. We'll do the rest.

If you are interested in working for a small company that offers excellent pay, benefits and working conditions, mail, fax or email your resume to Mike Schultz at:
